### STI RISK BEHAVIOR

- Unprotected anal sex: high risk
- Vaginal sex using condom: low risk
- Mutual masturbation: no risk
- Bathing together: no risk

Lesson 19: Page 3, from *Be Real. Be Ready*

from the Adolescent Health Working Group

**9<sup>th</sup> & 11<sup>th</sup> grade**

**PARENTS BEWARE:** The California Healthy Youth Act requires comprehensive sex education in California schools. . As a result, **K-12 students are exposed to sexually-explicit curriculums and ideas** in the classroom.

### **THE FACTS AB 329:**

- Communicates the acceptance of sex outside of marriage.
- Promotes anal sex, and encourages the act as a method to prevent pregnancy.
- Teaches children how to obtain birth control and the morning after pill, as well as how to get an abortion — **all without parental knowledge.**
- Exposes children to online links where they can read interviews discussing vaginal and anal sex.
- Subjects children to supplemental materials such as *It's Perfectly Normal*, a graphic book which illustrates nude males and females in sexually-explicit bedroom scenes.
- Mandates Comprehensive Sex Education in middle and high schools, but can be taught in all grades.

## THE FACTS:

- Comprehensive Sexuality Education is required in 7<sup>th</sup> and 9<sup>th</sup> grades, but can be taught in other grades.
- Gender identity and anti-bullying materials are attached in the curriculum, so these subjects are encouraged to be taught from Pre-Kindergarten through 12th grade.
- Parents **CANNOT** opt out of the gender identity lessons in any grade. And, these lessons can show up at any time, in any grade, and without warning.
- Vaginal, anal, and oral sex are normalized constantly throughout the six approved curriculums. The presentations on these subjects are mature and **NOT** age appropriate, even though the law says they should be.
- The curriculums are supposed to be "medically accurate," but they are not. For example, there are no condoms approved for anal sex, yet children are taught to use condoms to protect themselves during anal sex.
- Children are taught to use dental dams to protect themselves during oral and anal sex.
- Children are specifically taught that they can receive birth control, including the morning after pill and abortions, **WITHOUT** parental knowledge or permission — beginning at age 12.

*A special thank you to FaithandPublicPolicy.org and California school teacher Rebecca Freidrichs for their contribution toward the edugraphic*
